In 2010, Dr. Özdede graduated from Hacettepe University School of Medicine. He obtained his specialization in Internal Medicine in 2017 and served his mandatory state service at Safranbolu State Hospital until 2020. From 2020 onward, he has been a faculty member in the General Internal Medicine Division of Hacettepe University's Department of Internal Medicine. Dr. Özdede secured a certification in the Animal Use in Experimental Studies in 2019 and, in 2020, received certifications in both applied basic cell culture and Good Clinical Practices (ICH GCP). Moreover, in 2023, he enrolled in and successfully finished a basic edX course on "Machine Learning Algorithms."

Dr. Özdede primarily focuses on topics such as fatty liver, arterial hypertension, low-grade inflammatory conditions, rare diseases, and the creation and enhancement of clinical decision-support and prognostic risk classification systems. He has a special interest in data science and machine learning. Additionally, under the umbrella of the European Federation of Internal Medicine (EFIM), he crafted educational content centered around 4 genuine clinical cases relating to rare diseases. He remains an active contributor and reviewer on the EFIM academy platform.
